BULLETIN No 1 – ECU and Software

1. All cars need to use factory ECU with factory software: It is not allowed to tune ecu (make chiptuning) to get more power.
2. Only allowed Software changes is to delete exhaust emission control devices that reduce emissions like:
 - CAT - catalytic converter
 - cat heating
 - second lambda sensors
 - NOx sensor
 - NOx catalytic converter
 - EVAP - fuel tank ventilation system
 - secondary air system
3. Each competitor can make allowed software changes by itself.
4. Each competitor needs to provide to organizer original ECU software (before changes) and also remapped software, if changes for exhaust emission control devices are made. All software will be checked and if some corrections necessary, the Scrutineer will inform competitor.
5. If any changes are done Competitor needs to provide Vehicle VIN number, ECU label photo, ECU stock software, ECU remapped software -

GOOD LUCK!
